## **DETAILED ACTION**

### ***Information Disclosure Statement***

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the examiner on form PTO-892 has cited the references, they have not been considered.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Oldenhove (US 5,908,856).

Oldenhove discloses an aqueous composition containing at least a biostatic agent and at least one surfactant and water (abstract). The amount of the surfactant ranges from 0.5 to 10%; the amount of the biostatic agent ranges from 0.2 to 10 wt.% (column 2, lines 36-45). The surfactant is nonionic (column 2, line 46 to column 3 line 48) or anionic (column 3, line 49 to column 5 line 55). Oldenhove meets the limitations of the claims.

***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1 and 3 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 6,479,044.

Although the conflicting claims are not identical, they are not patentably distinct from each other because issued claim 1 comprises anionic surfactant, polyhexamethylene biguanide, non-anionic surfactant, fragrance and water; and the instant claim 1 contains anionic surfactant, water and polyhexamethylene biguanide. While issued claim 1 is not identical with instant claim 1, instant claims 1 and 3 taken as a whole represent obvious variation of the issued claims 1 and 2.

5. Claims 1 and 3 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 3 of copending Application No. 10/224,692. Although the conflicting claims are not identical, they are not patentably distinct from each other because anionic biopolymer of examined claim 1 includes anionic surfactant species of the copending application and the polyhexamethylene biguanide is the same in both the examined claims and the copending claims. Applicant "could gain an extension of term on a species when the broad genus is later issued" and "since without a

Art Unit: 1618

disclaimer, species claims preclude issuance of generic claims” of the copending claims. In re Emert, 44 USPQ2d 1152 (CAFC 1997).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

1. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach a composition comprising polyhexamethylene biguanide and mucin.
2. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
